(1594 to 1883)

Parish of Nossa Senhora do Rosário

Vila da Lagoa
São Miguel, Açores
Portugal
Summaries were prepared from LDS Microfilm #FHL INTL Film 1438005, items 4 through 9. (Entries from item 9; “Óbitos de Crianças,” or Children Obituaries have been inserted in their proper chronological order).

Summaries were prepared a one time basis. Although care was taken on character identification, errors could have been introduced through the condition of original documents, poor penmanship and spelling, and many other factors including subconscious personal spelling bias.

These summaries were performed with no intention of modifying the names from their archaic or misspelled forms. I couldn’t resist however putting my mark on it by adding my own preferences in bracketed italics directly following the name as interpreted. If two or more components of the name are considered archaic or misspelled the whole name is repeated in bracketed italics. I have ignored any modification where diacritics were missing in the original, such as in names like Antonio (António), Gloria (Glória), Jose (José).

Components of a name known to be a nickname “alcunha” are shown within quotation marks. Some “alcunhas” over time have become surnames.

Unless otherwise noted, all persons listed in these obituaries were residents in the Parish of Nossa Senhora do Rosário at the time of their deaths. Until March 1884, they were buried in the church grounds or in the grounds of sufrageneous Churches (Igrejas) or Chapels (Ermidas). After that, they were buried in the Public Cemetery.

The Municipal District (Concelho) of Lagoa comprises: Água de Pau (Parish of Nossa Senhora dos Anjos), Atalhada (Parish of Nossa Senhora das Necessidades), Cabouco (Parish of Nossa Senhora das Misericórdias), Ribeira Chã (Parish of São José), Rosário (Parish of Nossa Senhora do Rosário) and Santa Cruz (Parish of Santa Cruz). For the period covered by these Summaries the churches in Atalhada and Cabouco were sufrageneous to the Parish of Nossa Senhora do Rosário.

The parish of São José, Ribeira Chã, whose Church was built in 1853, was established on its own in 1962, and the Parish of Nossa Senhora das Misericórdias, Cabouco, was established on its own in 15 Sep 1980.

This project is dedicated primarily to Raul de Medeiros Pires and Maria do Rosario da Costa Rego, the greatest supporters in my life and the greatest parents a person could be born to. The sacrifices that they subjected themselves and my family to, in order to allow for the continuation of my education, shall never be forgotten.

Although my parents were the greatest influence in my life, the following persons merit mention in the formation of the person that I have become, my education and subsequently in the completion of this exercise: Dona Hortencia Plácido, who for some reason took an interest in my welfare and “brow-beat,” then finally convinced my parents that my education should continue past the primary school level, and facilitated in the acquisition of financial assistance to that end; the doctor Antonio de Oliveira Salazar from whom I received a modest scholarship as long as my marks merited it; my Confirmation Godfather Mariano Soares who facilitated financial help; Dona Helena Simone LeValle Rei Sousa Lima for subsidizing bus fare to school; the professor Hermano Feijo Junior for his support, time and assistance; the professor Antone Felix who agreed to sponsor me as a foreign student, just because I asked him during one of his many visits to São Miguel and then consented to be my guardian and housed me, free of charge, for a whole year while I attended New Bedford High School in Massachusetts.

There are many others, whom I hope not to have offended by not naming them. I am also very grateful to my fellow Portuguese and Azores genealogy lists members, who have been a great help and inspiration in the success that I have been able to attain in my own ancestry search.
Labourer - Camponeo, camponês, trabalhador, cruseiro (the occupation held by the majority of workers in São Miguel). Primarily they performed the manual tilling in preparation for seeding of crops as well as the maintenance hoeing (weeding), as crops grew and harvesting. Considered unskilled, these people were exceptionally knowledgeable about their industry, performed most of the manual labour on a hire as needed basis and most likely worked from sun-up to sun-down.

Although globally accepted, the terms “camponeo” and “camponês” are really disparaging and show the lack of respect these hard working people attracted, and to whom this project is in part dedicated.

Stone mason - Pedreiro (mostly quarry workers who mined and shaped the rock), cabouqueiro (could also be a ditch or foundation digger), oficial de pedreiro.

Tiller - Lavrador (and much more, these people, usually owned and/or worked with cattle and would trade plowing the fields (oxen pulled plows) in exchange for seasonal feed. The term globally applied to dairy and beef producing industry workers

Housewife – From the records as “ocupada no serviço doméstico” or “ocupada no termino de sua casa” and other variations on the theme.
